

SIDDHARTHA KOSURI

Boca Raton, FL | +1(561)7269812 | siddharthakosuri1@gmail.com | <https://www.linkedin.com/in/siddharthavsk/>

PROFESSIONAL SUMMARY

Founder with experience building and scaling AI agents, leading teams, and driving product. Master of Science in Information Technology. Skilled at wearing multiple hats across product, engineering, and growth.

EXPERIENCE

Co-founder, **Aimploy**

Dec 2025 – May 2026

- Founded and built an AI-powered career networking platform, onboarding 130+ users within the first month.
- Developed and deployed an AI agent that automates job discovery, networking, and personalized career recommendations.
- Implemented RAG pipelines to embed resumes and job postings, enabling LLM-powered structured recommendations with improved relevance.
- Integrated multiple AI workflows and continuously refined product features based on user feedback and usage patterns.
- Created product documentation, tested new features, and supported users throughout platform rollout.

Software Engineer & Product Manager, **Scale Agentic AI** (ScaleGrowth rebranded)

July 2025 – Nov 2025

- Led development of Scout, a GTM AI agent that automates prospect research and sales signal tracking for outreach teams.
- Gathered customer feedback, identified operational pain points, and translated insights into product improvements and automation features.
- Worked closely with engineering, design, and business teams to configure, test, and launch AI-powered capabilities.
- Helped streamline internal workflows through AI-driven automation and iterative product enhancements.
- Documented feature requirements and collaborated on implementation strategies to improve adoption.

Product Led Growth - **Scale Growth AI**

April 2025 – June 2025

- Designed website for GTM agent. Contributed to product UX by co-designing a dashboard for the product, focusing on short term gains. maintained the company website and co-designed a product dashboard to improve customer experience.
- Created sales documentation and implementation guides that aligned customer pain points with product capabilities.
- Collected user feedback, identified usability issues, and collaborated with product and engineering teams to improve workflows.
- Supported product rollout by testing features and recommending usability improvements.

Founder, **Checkworthy AI**

May 2024 – April 2025

- Built AI evaluation workflows to measure LLM factuality, reliability, and regression performance for production AI systems.
- Designed scalable evaluation pipelines and automation processes for testing AI applications.
- Led a 9-member cross-functional team, coordinating product planning, implementation, and execution.
- Identified workflow inefficiencies and developed AI-assisted solutions that improved evaluation consistency and operational efficiency.
- Worked closely with stakeholders to prioritize features, document requirements, and iterate based on real-world feedback.

Graduate Teaching Assistant – **Florida Atlantic University**

Aug 2023 – Dec 2024

- Mentored undergraduate students in Python programming, electronics, computer logic design, and introductory AI programming concepts.
- Created instructional materials, documented technical concepts, and guided students in applying Python to AI and automation-related assignments.
- Evaluated assignments, provided technical support during labs, and assisted faculty with research, coursework, and AI-related programming activities.

Systems Engineer – **Infosys Limited**

March 2022 – May 2023

- Trained in python, salesforce admin and developer. Worked across projects building lightning applications.
- Built and customized Salesforce Lightning applications while supporting enterprise software implementation projects.
- Configured Salesforce solutions and collaborated with cross-functional teams to deliver business applications.
- Assisted with system troubleshooting, user support, and process improvements across multiple projects.
- Worked with Python and Salesforce technologies to automate business processes and improve operational efficiency.

PROJECTS

Agent market: Multi agent orchestration using Google's ADK and A2A, A2UI protocols. [aimploy market](#)

Game Specter: Generate 2d games with prompts. Using freestyle and OpenAI API. [Gamespecter.com](#)

AI Employee: Using Agentmail and Dedalus mcp created workflows to make agents work as employees.

GitHub: <https://github.com/CheckworthyAI>

SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, HTML5, CSS3

AI & Machine Learning: Retrieval-Augmented Generation (RAG), Vector Embeddings, Prompt Engineering, LLM Evaluation, AI Agents, Multi-Agent Systems, Agent-to-Agent (A2A), Agent-to-UI (A2UI), AI Workflow Automation, Codex, Claude Code

Web Development: React, Next.js, Node.js, REST APIs, Responsive Web Design, Dashboard Development, Website Architecture, Vercel

Automation & Integrations: API Integrations, Workflow Automation, Business Process Automation, System Integration, AI-Powered Workflows

Product & Business: Product Management, Customer Research, User Experience (UX) Collaboration, Process Improvement, Technical Documentation, User Training

Core Competencies: Software Implementation, AI Solution Development, Cross-Functional Collaboration, Troubleshooting

EDUCATION

- Master of Science in Information and Technology Management, Minor Data Science
Florida Atlantic University, Boca Raton, FL, United States of America
Dec 2024
- Bachelor of Technology in Electronics and Communications.
JNTUH, Hyderabad, TL, India.
Aug 2021

ACHIEVEMENTS

- Student Engagement Association – President (FAU)
- **Perplexity** Campus Strategist FAU Aug 2024 – Dec 2024
- 2nd Place, AWS Cloud Quest 2024 - **Florida Atlantic University**
- Scholarship Teaching Assistant – (Aug 2023 – Dec 2024)
